

DEWAYNE C. DANTZLER

Computer Science Student: Bellevue College
Sammamish, WA • 206-856-6955

OBJECTIVE

Seeking IT position focused on artificial intelligence, machine learning, or data-driven applications where I can leverage extensive software development experience while expanding expertise in modern AI technologies.

PROFESSIONAL SUMMARY

Computer Science student at Bellevue College with more than 30 years of software engineering experience at Boeing. Background includes information systems, embedded systems, real-time data acquisition, cloud and enterprise software environments. Strong foundation in object-oriented design, C/C++, Java, Unix/Linux systems, and software lifecycle development.

WORK EXPERIENCE

The Boeing Company | Software Engineer | 1985–2020

Boeing Commercial Airplane Group | March 1992 – July 2020

LSAP Librarian Development Team (LSAPL)

- A member of the LSAP Librarian Development team (LSAPL), whose mission was to enable global airlines, aircraft operators, and Boeing service providers to effectively and securely manage software parts on any airplane, and to receive, consolidate, and route downlink data for integration with third-party and Boeing analytics and services.

Digital Data Production System (DDPS)

- A member of the Digital Data Production System (DDPS) group, which supports a suite of digital data products based on Air Transport Association (ATA) Specification 2100 and supports the nationally recognized web portal, MyBoeingFleet.com.

Flight Control Test Rig (FCTR) – 777 Iron Bird Program

- A member of the Flight Control Test Rig (FCTR) – 777 Iron Bird Data Acquisition Control System team, responsible for designing and developing the real-time data acquisition system used to test flight control laws.

Boeing Military Aircraft and Missile Systems | September 1985 – February 1992

- Worked on several defense programs as a software developer for embedded systems.
- Projects included the Common Stores Management Program, a simulation of an Air-to-Air and Air-to-Ground weapons system using the MIL-STD-1553 data protocol.
- Developed diagnostic software in 8086 assembly code for the Hard Mobile Launcher (HML) program.
- Developed built-in-test software for the Weapon Control System (WCS) Loader Controller and Monitor Unit.

EDUCATION

Bachelor of Science, Computer Science (Expected 2026)
Bellevue College

Bachelor of Science, Electrical Engineering
Stanford University, 1985

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python

Operating Systems: Unix/Linux, HP-UX, Windows

Concepts: Object-Oriented Analysis & Design, UML, Database Management, Real-Time Systems

CERTIFICATIONS & COURSEWORK

UW Extension Certificate – C++ Programming

UW Extension Certificate – UNIX/Linux Administration

UW Extension Certificate – Java 2 Programming

UW Extension Certificate – Object-Oriented Analysis and Design Using UML

UW Extension Certificate – Database Management

Current Bellevue College Coursework:

CS 310 – Python for Data Science

CS 455 – Cloud Computing

CS 460 – Machine Learning

CS 465 – Deep Learning

CS 495 – Capstone Research Project
